Description

Lady Gaga Dressup is a HTML5 dress up game. Open up your wardrobe, dress up the coolest popstar of the moment, and get on stage!

The CAPX package contains the game with 1920x1080 resolution that automatically scales to fit current screen device.

The game is fully compatible with all most common mobile devices. Still, it can use WebGL as graphic engines. To avoid any compatibility issues, check if your device supports it on this link: http://caniuse.com/#search=webgl . You can enable WebGL on the CAPX file, if needed.

More infos will be found in the comments added to the game.

This game can not be modified with a free license of Construct 2. The game was created with Construct 2 R259 release.

Admob Ads

Use the AdmobAds to add your ads' ID and start monetizing with this game!

For further info, please refer to https://www.scirra.com/manual/184/admob. WARNING: the admob plugin ID in this guide (*com.cranberrygame.phonegap.plugin.ad.admob*) is not updated. The latest plugin is: *cordova-plugin-admobpro*. You need to select third party plugins, ensure you are sourcing from the Cordova plugin registry, and enter cordova-plugin-admobpro in the Plugin ID field.

Change Images

The game contains the images sprites that you can edit if you want to change game images. Remember to arrange positions and dimensions according to your needs. You will also find some unused items (graphics ready) if you want to add and/or substitute some objects.

If you want to change images' graphic, replace the sprites with your own images, ensuring the positions and dimensions to be arranged properly as in the game.

Change Backgrounds

The game contains the background sprites that you can edit if you want to change graphic. If you want to change background graphic, replace the sprites with your own, ensuring the frames to be arranged properly as in the game.

Additional plugins used in this game

The game contains some non-native plugins you need to install before using the package. They are:

- callJS (free) by Joe7 (Scirra forum): https://www.scirra.com/forum/plugin-call-javascript_t64104

You can find the external plugins needed in the attached folder, with instructions to install them.

Game modifications

Texts can be changed modifying the variables in the "Global" tab (due to the use of SpriteFont+ plugin, special characters are not supported. To translate in any non-English language, please contact us for a quotation). These are:

- TEXT_ORIENTATION = "Please set your device to landscape orientation to play this game

properly";

- LIGHTFLASH = 3; How many seconds (max) the lights will be on/off.

Wordpress Plugin

CTL Arcade will allow you to add a real arcade on your worpress website, in this way your users will be more involved and will stay connected longer.

It's possible to add Ads banner at the beginning of each game and at the end of each level. This will give you a new tool to increase your revenues.

Your own users will promote your website sharing their scores on the main Social Networks, with no extra costs for you.

You'll get by default the score-sharing on Twitter. To add Facebook just follow the guideline below.

3 widgets can be added in your pages through a shortcode.

- Game iframe
- Rate the Game
- Leaderboard

Minimum Requirements:

- PHP 4.3
- WordPress 4.3.1
- HTML5
- Canvas
- Javascript / jQuery

This plugin is designed to work only with games built by Code This Lab.

You can find it here!
